PROFESSIONAL SUMMARY

Full Stack Java Developer with hands-on experience developing web applications using Java, Spring Boot, React.js, and MySQL. Experienced in designing RESTful APIs, implementing secure authentication with Spring Security and JWT, and integrating frontend and backend systems. Strong foundation in object-oriented programming, backend development, and building reliable application features with interest in cloud and platform technologies.

EDUCATION

B.Tech – Computer Science and Engineering	2022 – 2026
Sri Venkateshwara College of Engineering and Technology, Chittoor	CGPA: 7.8
Intermediate (Class XII)	2020 – 2022
Vagdevi Junior College	Percentage: 71%
SSC (Class X)	2020
Sri Vengamamba High School	Percentage: 99%

TECHNICAL SKILLS

Programming: Java, JavaScript

Frontend Development: HTML5, CSS3, React.js, Angular

Backend Development: Spring Boot, REST APIs, Hibernate (JPA), Node.js, Express.js

Database Technologies: MySQL, MongoDB

Tools & Platforms: Git, GitHub, Postman, VS Code, Eclipse IDE, Netlify

Concepts: Object-Oriented Programming, API Integration, Authentication (JWT), Web Security, Data Structures & Algorithms

PROJECTS

Study Group Finder — Full Stack (Infosys Springboard) GitHub

- Developed a full-stack web application using Java, Spring Boot, React.js, and MySQL to enable users to create and join study groups.
- Implemented JWT-based authentication and authorization using Spring Security for secure user access.
- Built REST APIs for managing users, groups, and interactions using Hibernate (JPA).
- Integrated WebSocket-based real-time chat functionality for communication between group members.
- Designed responsive UI components in React.js for seamless user experience.

WanderAI — Travel Planning Web Application Live

- Developed an AI-powered travel planning platform using React.js and Tailwind CSS for dynamic itinerary generation.
- Integrated Groq AI API to generate personalized travel plans based on user inputs.
- Consumed OpenWeather API to display real-time weather data for selected destinations.
- Designed a responsive UI and deployed the application using Netlify.

Task Management Application — Final Year Full Stack Project GitHub

- Developed a full-stack task management application using Angular, Node.js, Express.js, and MongoDB.
- Built REST APIs using Express.js to handle task creation, updates, and retrieval.
- Implemented JWT-based authentication and middleware for secure access control.
- Enabled structured communication between frontend and backend using HTTP requests.
- Tested and validated API endpoints using Postman to ensure accurate request-response handling.

CERTIFICATIONS

- Java Foundation Certification** — Infosys Springboard Dec 2025
- Full Stack Development Internship** — BLACKBUCKS (APSCHE)
- Software Engineering Job Simulation** — JP Morgan Chase (Forge)
